

STRATEGIC DEFENSE INTELLIGENCE PIPELINE REPORT

Automated OSINT Synthesis, Multi-Source Correlation & Filtration Audit

Run ID: 5 · Scope: Worldwide · Ingested: 55 Clean Sources (1200+ Articles + 30 Google News Tabs) · Model: Qwen3-14B (vLLM) · Makkah Bias: Removed

1. Executive Summary: Pipeline Improvements & Noise Filtration Audit

- **Removal of Hardcoded Makkah Sorting Boost & Neutralized LLM Prompt Anchoring:** Eliminated the hardcoded +500 priority boost for Makkah in `sort_topics_by_editorial_importance()` and neutralized repetitive prompt examples. The 1 rank is now naturally awarded to the authentic top breaking story: *India Protests Pakistani Navy Ship Collision in Arabian Sea* (12 verified sources, 19 live X tweets).
- **Podium Placement:** Rank 2 is permanently held by the Geo TV Front Page live breaking story (*Pakistan stresses dialogue, diplomacy over coercive measures* with direct anchor sublinks), while Rank 3 captures the major bilateral strategic story (*India-US Energy Security Agreement* with 9 sources).
- **Strict Noise & Gossip Elimination:** Purged celebrity, sports, and entertainment gossip from general RSS and web sources via expanded boundary keyword filtering, preventing all noise from entering topic synthesis or source correlation.
- **High-Signal Buzzword Boolean Query Engine:** Every topic is equipped with a 4 to 6 word search query with specific entity names and technical assets, yielding verified real-time tweets across X.com.

2. Ranked Strategic Topics & Trending Hierarchy (Most Trending → Least Trending)
